

AgileTech Studio

Culture and Benefits Guide

Our Mission

AgileTech Studio builds thoughtful, reliable software and AI-powered products that help our clients move faster without cutting corners. We exist to turn ambitious ideas into dependable, well-engineered systems.

Core Values

Craft Over Shortcuts

We take pride in well-engineered, maintainable work, even when a quicker fix would go unnoticed.

Clarity in Communication

We say what we mean, document what we build, and raise problems early rather than letting them surface late.

Ownership at Every Level

Every team member is trusted to make decisions in their area and is accountable for the outcomes.

Curiosity and Growth

We invest in learning new tools and approaches, and treat mistakes as information rather than failure.

Employee Benefits

Benefit	Details

Team Structure

- **Engineering** — Designs and builds the core software systems and platforms that power client products.
- **AI Solutions** — Develops applied AI and machine learning products, from chatbots to predictive models.
- **Design** — Owns product and visual design, from early UX research through to polished interfaces.
- **Client Success** — Manages client relationships post-launch and ensures delivered products keep meeting client needs.

- **Sales** — Identifies and closes new client engagements and manages the early-stage relationship.
- **HR** — Oversees hiring, employee wellbeing, policy, and workplace culture.

Office Locations

Lahore, Pakistan — Headquarters

Our HQ is located in Gulberg III, Lahore, and houses Engineering, AI Solutions, Design, and central leadership functions. The office includes dedicated focus rooms and a client demo space.

Karachi, Pakistan — Satellite Office

Our smaller Karachi office, based in Clifton, primarily supports the Client Success and Sales teams working with clients based in the south.

This guide is maintained by the People & Culture team and updated each year alongside the annual benefits review. For questions, contact hr@agiletechstudio.com.
