

AgileTech Studio

Finance Department Policy Document | Owner: Tariq Mehmood, Finance Manager | Version 3.0

Finance & Expense Policy

1. Purpose

This policy governs expense approval, budgeting, and financial reporting processes at AgileTech Studio.

2. Expense Approval Thresholds

Expense Amount (USD)	Approver
Up to \$500	Direct Manager / Team Lead
\$501 – \$2,000	Department Head
\$2,001 – \$10,000	Finance Manager (Tariq Mehmood)
Above \$10,000	CEO (Imran Sheikh) + Finance Manager

3. Project Budget Management

Each client project is assigned an approved budget at contract signing (see Projects.xlsx and Client_Projects.csv). Project-related expenses are logged in Expenses.csv and reviewed monthly by the Finance team against the approved budget. Team Leads (e.g. Ayesha Khan for NovaCart, Danish Iqbal for MedLink) are responsible for flagging any expense that would bring cumulative project spend above 80% of the approved budget.

4. Cloud Infrastructure Spend

AWS and other cloud infrastructure costs are billed to the project they support and require Engineering Manager approval (Faisal Rehman) each quarter. Recurring cloud costs above \$5,000/quarter require Finance Manager review.

5. Travel & Client Visits

Client-facing travel (e.g. kickoff visits, on-site workshops) must be pre-approved by both the traveling employee's Department Head and the Finance Manager, and logged with receipts within 5 business days of return.

6. Annual Budgeting Cycle

Department budgets are set annually each December for the following fiscal year, based on headcount plans and project pipeline. See [Annual_Budget.xlsx](#) for the current fiscal year's department-level allocations and the reconciled project budget summary.
