

AgileTech Studio

Human Resources Policy Document | Effective Date: January 1, 2025 | Version 2.0

Performance Review Policy

1. Review Cycle

AgileTech Studio conducts performance reviews twice yearly: a mid-year check-in (July) and an annual review (January), covering the prior calendar year.

2. Review Structure

Level	Reviewed By	Calibrated By
Individual Contributor (L1-L4)	Direct Manager / Team Lead	Department Head
Manager (L5)	Department Head	CEO
Department Head (L6)	CEO	—

3. Engineering Review Chain (Example)

Individual engineers on project teams are reviewed by their Team Lead, with input from the Engineering Manager, Faisal Rehman. For example, Hamza Sheikh and Mahnoor Butt (NovaCart) are reviewed by their Team Lead, Ayesha Khan, with Faisal Rehman calibrating scores across the NovaCart, MedLink, and FinTrack teams before submitting to Zainab Qureshi, Head of Engineering, for final sign-off.

4. Rating Scale

Rating	Description
Exceeds Expectations	Consistently delivers beyond scope; ready for promotion consideration
Meets Expectations	Reliable delivery against role expectations
Partially Meets Expectations	Some gaps; performance improvement plan (PIP) considered
Does Not Meet Expectations	Formal PIP required, HR involvement mandatory

5. Promotion Process

Promotion requests are initiated by the reviewing manager and require Department Head approval plus confirmation from HR that the new salary band aligns with Salary_Bands.xlsx. Promotions take

effect at the start of the following quarter.

6. Performance Improvement Plans (PIPs)

A PIP is a structured 60-day plan set by the Direct Manager in consultation with HR (Mehwish Aslam or Kiran Javed), with clear, measurable goals and a formal check-in every two weeks.
