

AgileTech Studio

Internal Reference Document | Owned by: Mehwish Aslam, HR Manager | 2026

Company Culture & Values

1. Our Values

Value	What It Means at AgileTech Studio
Craftsmanship	We take pride in well-engineered, maintainable software — not just shipped features.
Ownership	Team Leads and engineers own outcomes end-to-end, from architecture to production support.
Transparency	Project status, budgets, and risks are visible and discussed openly, not hidden until review.
Client Partnership	We treat client relationships (RetailPro, HealthBridge, Capital Insights, LearnWave) as long-term partnerships.

2. How We Work

Small, senior-led teams are core to how AgileTech Studio delivers. Each active project has a single accountable Team Lead — for example Ayesha Khan on NovaCart or Danish Iqbal on MedLink — supported by a focused team rather than a large, diffuse one.

3. Recognition

Quarterly "Studio Spotlight" recognizes individuals who exemplify our values, nominated by peers and reviewed by department heads (Zainab Qureshi, Bilal Ahmed, Sana Yousaf, Mehwish Aslam, Tariq Mehmood).

4. Diversity & Inclusion

AgileTech Studio is committed to building teams representative of the communities we operate in across Lahore, Karachi, and Islamabad, and maintains a zero-tolerance policy for discrimination or harassment, enforced by HR under the Employee Handbook.

5. Social & Team Events

Each office runs a monthly team lunch, and the whole company gathers annually in Lahore for the AgileTech Studio Summit, combining an all-hands update from CEO Imran Sheikh with team-building activities.
